os ensaios presentes neste livro constituem uma reflexão inicial que pode ajudar sobremaneira aqueles que estão dando os primeiros passos nos estudos filosófico teológicos são também acessíveis para o grande público já que sua escrita é clara e objetiva procurando iluminar questões centrais tanto da filosofia quanto dos três ramos principais da teologia sistemática a antropologia teológica a cristologia e a teologia trinitária a partir desse esforço intelectual e de vida a marta luzie afirma ter encontrado a compreensão da essência do ser

humano e do drama que é a vida aliás como diz um dos maiores teólogos católicos do século xx a vida não é uma comédia tampouco uma tragédia ela é simplesmente uma repetição do drama vivenciado por Jesus Cristo

through examination of the death penalty in literature Aaron Aquilina contests Heidegger's concept of being towards death and proposes a new understanding of the political and philosophical subject Dickens Nabokov Hugo Sophocles and many others explore capital punishment in their works from Antigone to Invitation to a Beheading using these varied case studies Aquilina demonstrates how they all highlight two aspects of the experience first they uncover a particular state of being or more precisely non being that comes with a death sentence and second they reveal how this state exists beyond death row as sovereignty and alterity are by no means confined to a prison cell in contrast to Heidegger's being towards death which individualizes the subject only I can die my own death supposedly this book argues that when condemned to death the self and death collide putting under erasure the category of subjectivity itself be it death row or not when the supposed futurity of death is brought into the here and now we encounter what Aquilina calls relational death living on with death severs the subject's relation to itself the other and political sociality as a whole rendering the human less a named and recognizable being than an anonymous living corpse a human thing in a sustained engagement with Blanchot Levinas Hegel Agamben and Derrida the ontology of death articulates a new theory of the subject beyond political subjectivity defined by sovereignty and beyond the Heideggerian notion of ontological selfhood

in the early 1950s German philosopher Martin Heidegger proclaimed the Austrian expressionist Georg Trakl to be the poet of his generation and of the hidden Occident Trakl a guilt-ridden lyricist who died of a cocaine overdose in the early days of World War I thus became for Heidegger a redemptive successor to Hölderlin drawing on Derrida's *Geschlecht* series and substantial archival research *Dialogue on the Threshold* explores the productive and problematic tensions that pervade Heidegger's reading of Trakl and reflects more broadly on the thresholds that separate philosophy from poetry gathering from dispersion the same from the other and the native from the foreigner Ian Alexander Moore examines why Heidegger was reluctant to follow Trakl's invitation to cross these thresholds even though his encounter with the poet did compel him to take up in astounding ways many underrepresented topics in his philosophical corpus such as sexual difference pain animality and Christianity a contribution not just to Heidegger and Trakl studies but also more modestly to the old quarrel between philosophy and poetry *Dialogue on the Threshold* concludes with new translations of eighteen poems by Trakl

seit den 1980er Jahren ist ein Prozess im Gang, der für die Gesellschaft so umfassend ist wie kaum ein anderer zuvor. Die Digitalisierung betrafen frühere technologische Neuerungen meist nur spezifische Bereiche. Erweisen sich die gesellschaftlichen Auswirkungen der Digitalisierung als ungemein breitenwirksam, das betrifft auch die soziale Arbeit. Dieses Buch bietet einen Überblick über die zentralen sozialwissenschaftlichen Diskurse und analysiert die Folgen der Digitalisierung für die soziale Arbeit. Dabei werden die Exklusionsrisiken der Digitalisierung für deren Adressatinnen und Adressaten herausgestellt, ohne die Chancen dieses technologischen Umbruchs zu vernachlässigen. Abschließend wird gezeigt, wie sich soziale Arbeit durch Digitalisierung wandelt und welche neuen Fragen bezüglich der Kommunikation, Prognostik und Berufsethik entstehen.

Is there a world out there independent of the way we experience it, think of it or talk about it? If so, can we know how it is? These questions have been a central concern of philosophy throughout most of its history, and they continue to be the subject of an intense debate between realists and antirealists. In this clearly written and comprehensive book, Søren Harnow Klausen presents an argument for realism about the external world, but also attempts to take the antirealist challenge seriously. A sensible realist must acknowledge the force of the skeptical objections and avoid overstating her own case. The book covers a wide range of themes, from the historical origins of antirealism and the views of Berkeley, Kant, Husserl, and the logical positivists to the most recent developments in epistemology and relevant empirical research in psychology, anthropology, and linguistics. Topics also include the definition of realism and its relationship to semantics and theories of truth, the prospect of providing a transcendental argument for realism, inference to the best explanation, externalist theories of justification, the basis of our understanding of mind-independent reality, the relevance of evolutionary biology to the realism issue, and theories of intentionality and perception.

This book explores the concept of academic freedom from a European vantage point, drawing on both philosophical and legal perspectives. The editors and contributors analyse the concept of academic freedom within the present institutional setting. Academic freedom has long been considered a natural part of higher education, but as the world enters the digital age, a renewed understanding of its role and the threats it must face is required. The authors question the purpose of science without freedom and, subsequently, the purpose of political communities without free science. Although the book uses European case studies to answer these questions, it undoubtedly has global relevance. What would be left of the present notion of the global world were we to conceive of its

character without modern science this book calls for a critical re examination of the academic community and its own understanding of the sources conditions and aims of scientific practice
